

TELEMATICS PROGRAM FOR FLEETS

EMPOWERING SAFER FLEETS
THROUGH DATA-DRIVEN INSIGHTS

Managing a fleet is complex—but your insurance doesn't have to be. Northbridge Insurance's telematics-enabled program is designed to help you make informed decisions, improve safety, and unlock potential savings.

HIT THE ROAD SAFER WITH OUR TELEMATICS PROGRAM

Thanks to our partnership with **TruckerCloud**, sharing data from your existing **telematics devices** is simple—and it can pay off.

By sharing your fleet's telematics data, you could receive a discount on your auto insurance premium of up to 10%.

Here's how you could benefit:

Initial Discount:

- A minimum 5% discount is applied to your fleet automobile insurance premium in the first year of enrollment.
- To qualify for the discount, at least 90% of the fleet must be sharing data from an eligible telematics device provider(s).
- If we are able to access your telematics data from the past 12 months, you may be eligible for a total discount of up to 10%.
- The premium discount cannot exceed \$50,000.

Renewal Terms:

- After the first policy term, the initial 5% discount no longer applies.
- A new telematics-based discount (ranging from 0% to 10%) will be calculated using the most recent 12 months of data.
- The premium discount cannot exceed \$50,000.

Good to know:

- **Your data, your advantage.** Telematics data is used to help you earn discounts based on safe driving, not to increase your premium.
- **Your privacy matters.** Both [Northbridge](#) and [TruckerCloud](#) maintain security measures that meet or exceed industry standards, ensuring your data is handled safely and responsibly.

JOINING IS EASY

- No new hardware or installation required
- Easy enrollment through your existing telematics devices, if eligible
- Real savings for safer, smarter fleet operations

About Northbridge Insurance

Northbridge Insurance is a leading Canadian commercial insurer. Working closely with our broker partners and leveraging our in-depth industry expertise, we help businesses operate more safely so they can worry less about risks and focus on opportunities.

About TruckerCloud

TruckerCloud is the leading telematics data platform for commercial auto insurance, trusted by insurance companies and fleets across North America. TruckerCloud's secure data platform brings together ELD and camera insights and connects seamlessly with more than 120 telematics providers—including Isaac Instruments, Fleet Complete, Samsara, Motive and Geotab.
